

# Introducing OpenWorks TotalWorks™ for Commercial Cleaning, Disinfection and Infection Control for Coronavirus

## Executive Report

Commercial cleaning and disinfection is the best way to keep coronavirus and other viruses from spreading in the workplace. Learn how TotalWorks™ can help.

# Introducing OpenWorks TotalWorks™ for Commercial Cleaning, Disinfection and Infection Control

According to the National Institute of Health (NIH), coronavirus (COVID-19) can be detected in aerosol form for up to 3 hours. It can be active on copper surfaces for 4 hours, cardboard for a full day, and found on plastic or stainless-steel surfaces for as long as three days. In a commercial facility, this creates a lot of opportunities to spread germs and infections.

OpenWorks is the better choice for commercial cleaning. We offer TotalWorks™, which provides a range of commercial cleaning and comprehensive disinfection services combined with advanced cleaning protocols. TotalWorks™ features cleaning and disinfection best practices with the type of high-touch and high-frequency disinfection service recommended by the Center for Disease Control (CDC) and NIH for infection control.

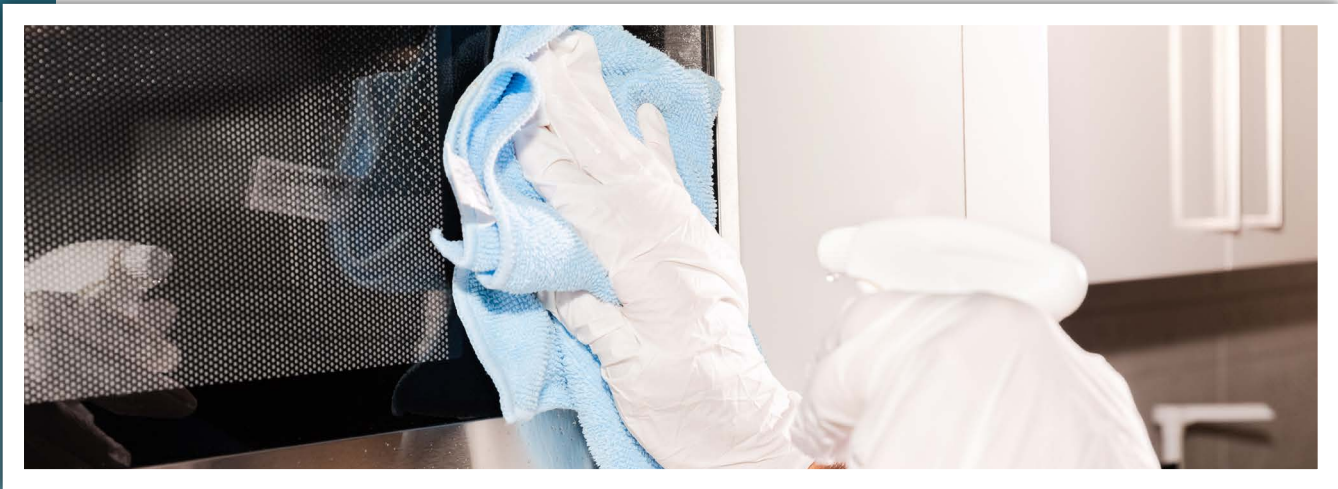

The TotalWorks™ commercial cleaning and coronavirus disinfection service produces an exceptionally clean and sanitary facility. After surfaces are cleaned, they are disinfected with CDC-approved processes, including high-touch surfaces such as door handles and knobs, elevator buttons and pads, stairway handrails, light switches, cabinet, and file drawer handles, and copier, printer, and other electronic buttons, using EPA-registered disinfectants.

# The TotalWorks™ Disinfecting System

To help customers prevent the spread of Coronavirus, also known as COVID-19 and SARS-CoV-2, OpenWorks provides three different levels of service that customers can choose depending on the types of services they want and how frequently they need their workplace cleaned and disinfected.

	SaniCare™	SaniWorks™	SaniTech™
Clean all workspaces and common areas	Daily	Daily	Daily
<b>Restrooms &amp; Kitchen Surfaces:</b> clean and disinfect	Daily	Daily	Daily
<b>Restrooms:</b> Disinfect walls and stalls	Weekly	Daily	Daily
Clean and disinfecting of all high touch point areas	Weekly	Daily	Multiple Times Daily
Dust ceiling vents	Monthly	Monthly	Monthly
Dedicated cleaning tech to spot clean and disinfect through the day			Multiple Times Daily
Display sign validating facility has been cleaned & disinfected	X	X	X
Certificate of disinfection per CDC recommendations		X	X

# InfectaGuard™ For Deep Cleaning & Added Disinfection Services

InfectaGuard™ is our in-depth deep cleaning and disinfection service that gives you the peace of mind that your facility is disinfected with EPA-approved anti-microbial disinfectants to prevent the spread of germs that cause infections, such as influenza and COVID-19. InfectaGuard™ is a great service to have prior to re-opening or re-entering your facility.

InfectaGuard+™ includes everything offered in the InfectaGuard™ service along with additional protection for COVID-19, biohazard cleaning and disinfecting, and application of a six-step process for decontamination and infection control that is recognized by the Global BioRisk Advisory Council (GBAC). InfectaGuard+™ is a great service for a facility that has experienced a known case of COVID-19, a virus outbreak or a biohazard.

	InfectaGuard™	InfectaGuard+™
Clean all workspaces and common areas	X	X
<b>Restrooms &amp; Kitchens:</b> clean and disinfect all surfaces, walls, stalls	X	X
Clean and disinfecting of all high touch point areas	X	X
Clean and disinfect carpets and rugs	X	X
Sweep, dust, mop hard surface floors	X	X
Clean and disinfect all service glass, entry points, elevators, windows and window sills	X	X

# Why Choose OpenWorks for Coronavirus Disinfection and Infection Control

OpenWorks has more than three decades of commercial cleaning and disinfecting experience. We currently service more than 4,000 facilities nationwide with more than 30 million square feet of office and industrial space. Customers trust OpenWorks nationwide network of elite service providers. In an industry that has a 55% average customer retention rate, OpenWorks retention rate is 98%.

Our service providers use cleaning products and disinfectants that are approved by the EPA for use against SARS-CoV-2. We use personal protective equipment (PPE) and follow CDC cleaning and disinfecting protocols that eliminate 99.9% of bacteria and viruses on exposed surfaces, including salmonella and E. coli, common viruses such as cold and flu, and disinfectant-resistant pathogens such as MRSA.

As a member of the International Sanitary Supply Association (ISSA), we qualify as technical experts on disinfection techniques. Our staff and service providers have been certified by the Global Biorisk Advisory Council (GBAC), a division of the ISSA, and have completed the Microbial Warrior™ Workshop in infection control and contamination control. This training specifically focuses on COVID-19. Our team is also trained and certified in OSHA Bloodborne Pathogens protocols.

OpenWorks applies its total facilities management approach to provide top-to-bottom cleaning, disinfecting, and sanitation solutions.
